

TIGA TALK!

Pea Pod canoes

You will need:

- Peas that are still in the Pods.
- Short small sticks, about $\frac{1}{4}$ - $\frac{1}{2}$ in long (pieces of toothpicks work).

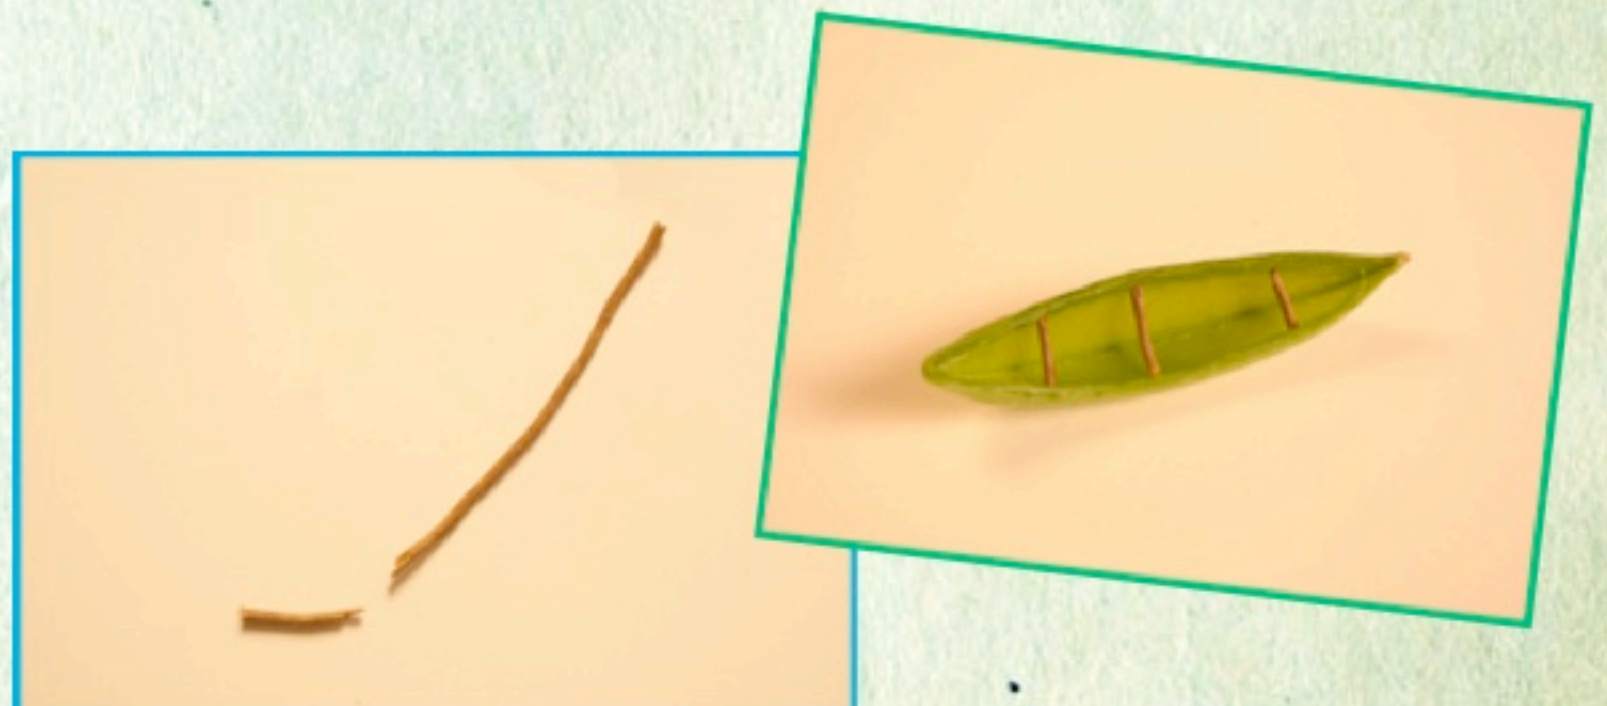

1. Open the Peas from the straight side, or from the opposite side you usually open Pea Pods.

2. Take the Peas out of the Pod.
3. Most important....eat the Peas, yummy!

4. Use the small Pieces of sticks to Brace the 'canoe' (Pea Pod) open.

5. Float the canoe in some water, in the Bath, though sometimes they do tip over.
