

# TIGATALK!

## Pasta Jewelry

**You will need:**  
- Coloured Pasta  
- String

1. Get an adult to colour some different types of pasta. To colour the pasta they need to add some unsweetened drink crystals to the water heat the water and pasta but do not cook thoroughly just until the pasta is coloured. Cool and separate the pasta pieces individually on a cookie sheet. They need to be turned as they dry to keep the colour even. Let them dry thoroughly it takes about a day

2. Cut some string for your necklace or bracelet.

3. Put the string through one piece of large pasta and tie it onto the end. This way you won't lose the pasta that you are putting onto the string by pulling it through

4. Add as many pieces of pasta as you wish to make your jewelry. You can add pieces of coloured paper or cut up pieces of drinking straws between the pieces of pasta.
